

Smart City, Village, and Region (SCVR) summer course is short term intensive course which takes place in **Faculty of Geography, Universitas Gadjah Mada, Indonesia**. This summer course is designed for students who are willing to work hard to improve their understanding, knowledge, and skill in smart city, village and region. Various participants are encouraged to join this course in order to enrich the discussion; from undergraduates, post graduates, PhD students, professionals, and also institutions.

THE FOCUS

SCVR summer course offers various learning methods. Combining inside class learning and chance to do field observation. This course aim for the participants to gain most of experiences regarding the knowledge of smart city, village, and region as a whole. Not only participants will learn the necessary knowledge in class, but also they will do an excursion around Yogyakarta and Surakarta to do direct observation of smart city, village and region implementation in the area. The course material that will be given by Asian and Europeans experts in Smart city, village, and region will cover various topics:

1. Understanding city, village, and region; and identification of problems
2. Definition and concept of SCVR
3. Infrastructure for supporting SCVR
4. Social political aspects of SCVR
5. Aspect of information technology for SCVR
6. Implementation of SCVR: elements, indicators and components
7. Case study and exercise
