# MASTER IN CONSTRUCTION TECHNOLOGY MANAGEMENT

*FACULTY OF DESIGN AND ARCHITECTURE, UPM*

# OVERVIEW

The MCTeM program prepares building professionals in an agile, integrated project delivery (IPD) environment. IPD covers the entire lifecycle process from pre-construction, construction, and post-construction phases involving collocated and non-collocated communication. The program exposes students to BIM culture and uses value management for decision-making and information management. The program is intended for built environment professionals, professional practice managers, design-built professionals, construction company managers, construction project managers, and building and technologies suppliers for the construction industry.

# CAREER PROSPECTS

Consulting firm managers, construction company managers, design managers, construction project managers, design consultants, integrated project consultants, researchers, construction industry entrepreneurs and others.
